

# Mayank Khattar

## Frontend Developer

I describe myself as a passionate developer who loves coding, open source, and the web platform ♥. Aside from my job, I like to create and contribute to open source projects. That helps me to learn a ton of new stuff, grow as a developer and support other open source

## PERSONAL PROJECTS

### Burger Maker (11/2020)

- The burger maker is pretty self-explanatory, it's an application that allows a user to build a custom burger from a set of ingredients. Once they have created a burger, they can "checkout" and then keep track of their previous orders.

### Crawler (10/2018)

- In this crawler project we collect web address from web servers of given web address command line argument and we can collect more web address from abstracted web address, in this we use various operation for validating web address.

### Nano degree: Front End Web Developer (01/2018 – 03/2018)

- The main objective of Nano degree is to get into the real world of web programming. This Nano degree is about the fundamentals of how the web works and gains a working Knowledge of the foundational languages that power every website: HTML, CSS and JavaScript basics and more advanced front-end skills.

### Online Food Order Interface (11/2018)

- The project is about online food order interface in HTML using CSS, JavaScript, JQuery. In this we add food to cart from different pages and we have total of amount in checkout page, in this we perform various operation of Html, Javascript and JQuery we provide css to look interface more attractive.
